

MICHAEL THOMAS

Senior Software Engineer with experience in both government and commercial domains, specializing in back-end systems, scalable architectures, and legacy modernization. I enjoy turning ambiguous customer needs into effective solutions, including decomposing monolith architectures into microservices, planning long-term roadmaps, or collaborating with stakeholders. I enjoy working directly with customers and cross-functional teams to clarify goals, plan strategically, and deliver reliable results. Whether I'm leading a feature from design through delivery or helping peers succeed professionally, I'm driven by impact, clarity, and sustainable growth.

SKILLS

Programming

- Go
- Java
- C#
- SQL
- Bash
- HTML/CSS
- Typescript

Operating Systems

- MacOS
- Ubuntu
- Windows
- Oracle Linux

Software & Tools

- Git
- Docker
- PostgreSQL
- OpenAPI
- Angular
- NodeJS
- BitBucket
- Confluence
- Jira
- AWS API Gateway
- AWS CloudFront
- AWS IAM
- AWS KMS
- AWS DynamoDB
- AWS Lambda

Languages

- English

CERTIFICATES

- MSOS: Microsoft Excel 2013
- MSOS: Windows Operating System Fundamentals
- GMRS License

WORK HISTORY

- Software Engineer III
📍 Sherpa 6
📅 Aug 2023 - Current
 - Full stack development supporting an enterprise mobile device management platform.
 - Developer SME in key program events, security reviews, and integrations.
 - Worked with UX designers, leadership, and stakeholders to design sprint-ready features.
 - Guide professional development of team members.
 - Develop coding and review standards.
- Software Engineer II
📍 Aiphone
📅 May 2023 - Aug 2023
 - Expand SaaS offerings using AWS.
 - Web architecture design and CI/CD management.
- Software Engineer I
📍 Amazon
📅 Feb 2022 - Feb 2023
 - Decouple monolith architectures with microservices.
 - Optimize high-impact legacy services.
 - Security vulnerability remediation and documentation.
 - Migrate legacy services to supported architectures.
 - Develop and analyze A/B test to make market decisions.
- Support Engineer
📍 Amazon
📅 May 2019 - Feb 2022
 - Diagnose and resolve critical issues in production.
 - Interface with external teams to design and ship new components.
 - Add new features for KTLO products.
- Lab Engineer
📍 Microsoft
📅 Jan 2015 - Oct 2018
 - Design an implement monitoring software to generate alerts and reports on device health.

EDUCATION

- B.S. - Computer Science
📍 Bellevue College
📅 Sept 2018 - May 2021

KEY ACHIEVEMENTS

- Enabled the marketplace expansion of the Amazon Kids+ program, resulting in a 320% increase in daily traffic to the program.
- Resolved high-impact production issues during on-call shifts, including failures affecting 1.58 million users.

RESPONSIBILITIES
